

John C. Lincoln Breast Health and Research Center

Open House

Saturday, May 16

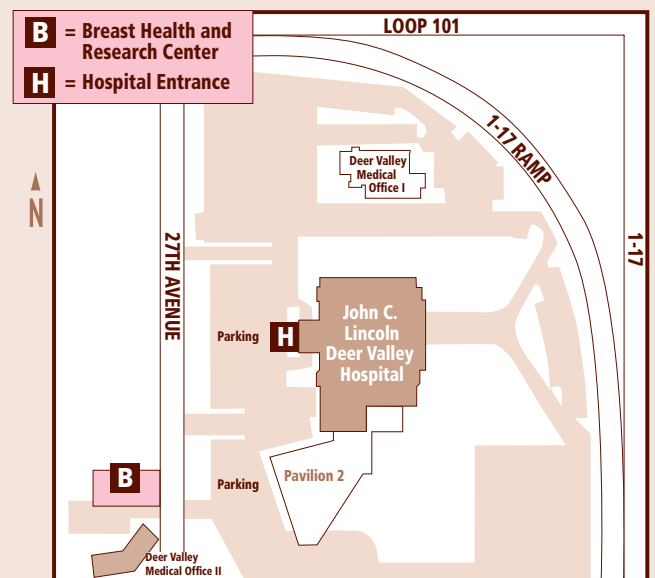

10 a.m. to 1 p.m.

- Tours
- Refreshments
- Breast health information

The John C. Lincoln Breast Health and Research Center in north Phoenix provides expert screening, diagnostic and interventional services for women using state-of-the-art equipment and procedures all in a comforting, educational environment.

At the John C. Lincoln Breast Health and Research Center, you'll find:

- ❖ Less waiting – and less worrying – about results, with most biopsy test results back in 24 hours and diagnostic exam results provided to you at the time of service.
- ❖ Staff with specialized certification and advanced imaging experience in breast care. Two well-respected breast imaging radiologists are dedicated to the center.
- ❖ Multiple services scheduled and tracked through one center. Our patient care coordinator will track your medical records, help you with physician appointments and communicate with your referring physician.
- ❖ The newest digital screening, diagnostic imaging and interventional breast procedures, able to detect cancer at its earliest stages – before you can feel a lump – and when the survival rate is the highest.
- ❖ Resources such as a multimedia research library with a research assistant to help patients and families get the answers they need to fight the disease.
- ❖ Relationships with organizations such as Susan G. Komen for the Cure, the Wellness Community and Buddy Check 12 as well as research groups such as TGen and others that are focused on finding a cure for cancer.
